GTX 620-3

Golf GTX range is designed to provide a superior touring experience by combining rugged durability and full off-grid capability with luxury styling and modern design.

The Golf Grand Tourer aXtream range is built to withstand various road conditions and weather elements, making it ideal for long-distance travel and adventures.

Despite its rugged capabilities, the Golf GTX Range doesn't compromise on style. The interior and exterior design focus on contemporary aesthetics with sleek lines and premium finishes.

The GTX range offers improved safety systems that provide peace of mind on the road, such as advanced braking systems, a robust chassis design and the Alko off road Enduro X suspension.

The GTX range specifically designed to work completely off grid. This is achieved by using golfs unique one-piece roof design that allows for a Large solar array which is backed up by 2 high capacity underfloor mounted Lithium batteries. Along with the DC-DC charging system, onboard inverter and energy efficient appliances. The GTX allows you to stay of grid without having to compromise on comfort.
